BIOGRAPHY

Pierre Freneau (born in 1997 in Mantes-la-Jolie, France) lives and works in Paris. After graduating in Materials Science and Welding Engineering from Polytech Nantes in 2020, he moved to Amsterdam to work in large-scale metal 3D printing. End of 2024, he returned to France and settled in Paris to dedicate himself to his artistic career.

His work has been exhibited in several group exhibitions in Paris, including ICART's Mayfly Aurora exhibition (2025) and the Maison Bailly Charity Auction (2025), as well as in a solo exhibition at La Marine, Langrune-sur-Mer, France (2025).

STATEMENT

My work emerges from a blend of spontaneous visions, observations, and instinctive responses, transforming introspective reflections into mental images that I then bring onto canvas.

The resulting art is a composition of real-life experiences and abstract scenes, as a translation of the feelings, situations, and encounters that shape daily life. Drawing inspiration from surrealist and symbolist movements, my works often incorporate neutral faces, disjointed body parts, and powerful elements in unconventional contexts. The use of these symbols and their association within the scenes generate metaphorical situations, inviting the viewer to a reflection that reconnects them with their own experiences.

Each piece is a dialogue between the visible and the invisible, the symbolic and the rational, encouraging the viewer to explore their own emotional and perceptual boundaries.
